## Product description

This gene encodes a member of the S1, or chymotrypsin, family of serine peptidases. This protease catalyzes the cleavage of factor B, the rate-limiting step of the alternative pathway of complement activation. This protein also functions as an adipokine, a cell signaling protein secreted by adipocytes, which regulates insulin secretion in mice. Mutations in this gene underlie complement factor D deficiency, which is associated with recurrent bacterial meningitis infections in human patients.

Reference sequences:	NM_001928 NP_001919 Swiss-prot P00746
Alternative names:	D component of complement adipsin properdin factor D C3 convertase activator
EC_number:	3.4.21.46
Gene ID:	1675

Residues 26-253 of human Complement factor D were cloned, the protein was over-expressed in HEK293EBNA1 cells and was purified to homogeneity. The calculated molecular weight of recombinant human complement factor D is 24.7 kDa. Each vial contains 100 µg complement factor D at 6.08 mg/ml.

## Storage and stability

Recombinant complement factor D should be stored at - 80 °C (stable for at least 1 year). The protein is stored in 25 mM tris 150 mM NaCl pH 7.5. After thawing it should be stored in appropriate small aliquots at - 20 °C or - 80 °C (stable for at least 2 months).

## PRODUCT USE LIMITATIONS, WARRANTY, DISCLAIMER

U-Protein Express BV products contain chemicals which may be harmful if misused. Due care should be exercised with all U-Protein Express BV products to prevent direct human contact. All products are intended For Research Use Only and ARE NOT ALLOWED FOR USE IN HUMANS. Each U-Protein Express BV product is shipped with documentation stating specifications and other technical information.
