Product description

This product contains the receptor binding domain (RBD) of the spike glycoprotein protein (S-protein) of the SARS-CoV-2 corona virus. Infection with this virus causes COVID-19 disease. The spike protein is the common target for neutralizing antibodies and vaccines. The Spike protein contains two subunits, S1 and S2. Subunit S1 contains a receptor binding domain (RBD), which is responsible for recognizing and binding with the cell surface receptor ACE-2 (products A004 and A005). S2 subunit contains other basic elements needed for the membrane fusion and trimerisation.
