

**Product Name**

Monoclonal Human  
Protein arginine N-methyltransferase 3 (PRMT3)  
immunoglobulin

**CAT No.**

MQR 2.1601

**LOT No.**

16220

**Quantity**

100 µg

Edition: May 30, 2017

**Intended use**

This product is for research use only. NOT for use in diagnostic or therapeutic procedures.

This product is tested for use in enzyme-linked immunosorbent assay (ELISA), immunoprecipitation (IP) and Chromatin immunoprecipitation quantitative real-time PCR (ChIP-qPCR).

**Reagent provided**

The antibody is supplied in PBS

**Isotype**

Human IgG1κ

**Immunogen**

Human protein arginine methyltransferase 3 isoform 1 (211-531 of 531)

**Specificity**

Specificity has been tested in ELISA (figure 1), IP-MS and ChIP-qPCR.

**Purity**

Protein A purified.

**Precautions**

1. For professional users.
2. As with any product derived from biological sources, proper handling procedures should be used.
3. The product may be used in different techniques and in combination with different sample types and materials, therefore each individual laboratory should validate the applied test system.

**Preparation of the antibody**

Use antibody as supplied.

**Storage instructions**

Store at -20°C.

**Application guidelines**

ELISA: 1:250000 – 1:125000

IP: 2 µg/ml

Unless the stability in the actual test system has been established, it is recommended to dilute the product immediately before use.

**Relevance**

Methylates (mono and asymmetric dimethylation) the guanidino nitrogens of arginyl residues in some proteins. Inhibited by N-ethylmaleimide and high concentrations of zinc chloride.

Figure 1: Specificity of PRMT3 (MQR2.1601), determined by ELISA. Antibody diluted in PBS containing 0.05% tween-20 and 1% BSA was tested on human PRMT3 and BRD1 (non-target).
